Service Manual

CONET

RDS-FON FM/MW/LW Radio CD Combination with MD/CD **Changer Control**

Model

DRX6675Rz

(PE-2335E-A)

MC-Service

■ ORIGINAL SERVICE MANUAL

This additional service manual is designed to be used together with Model PE-2191E-B.

Original model	Manual No.
DRX6575Rz(PE-2191E-B)	298-5699-00

■ DIFFFRENCE FROM ORIGINAL MODEL

1 EXPLODED VIEW - PARTS LIST 2.ELECTRICAL PARTS LIST

3.CD MECHANISM

4.CIRCUIT DIAGRAM

5.PRINTED WIRING BOARD

COMPONENTS

PE-2335E-A

Main unit		1
Remote controller	RCB-130-700	1
Battery(SUM-3)		2
Mounting bracket	300-7745-00	1
DCP case	335-6035-02	1
Escutcheon(OUT)	370-5774-00	1
Part's bag		
Removal tool	331-2548-00	2
Rubber cap	345-3653-01	1
Screw	716-0726-01	1
A-lead(for cellular p	hone)	
	850-6681-00	1

■ NOTE

*We cannot supply PWB with component parts in principle. When a circuit on PWB has failure, please repair it by component parts base. Parts which are not mentioned in service manual are not supplied.

FEATURES

- 1.RDS-Pro Receiver with Controller for MD and CD Changer
- 2.CD-Deck with 1-Bit D/A Converter and 8-Times Oversampling
- 3. Fully Detachable Flip Down Control Panel with Rotary Encoder
- 4. High Power 4×45W Max./4 Gold Plated RCA Line Level Output

■ To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

1.Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equiva lent characteristics when replacing them.

The use of unspecified parts shall be regarded as remodeling for which we shall not be liable. The onus of product liability(PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

2.Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulationtubes, bonding, gaps to PWB, etc, is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.

If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

3.Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of second ary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repair ing company.

4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur.

If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repair ing company.

5. Cautions regarding chips.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc). The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.

6.Cautions in handing flexible PWB

Before working with a soldering iron, make sure that the iron tip temperature is around 270°C. Take care not to applthe iron tip repeatedly (more than three times) to the say me patterns. Also take care not to apply the tip with force.

- 7.Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit
- 8. Cautions in checking that the optical pickup lights up.

The laser is focused on the disc reflection surface through the lens of the optical pickup. When checking that the laser optical diode lights up, keep your eyes more than 30cms away from the lens. Prolonged viewing of the laser within 30cms may damage your eyesight.

9. Cautions in handing the optical pickup

The laser diode of the optical pickup can be damaged by electrostatic charge caused by your clothes and body.

Make sure to avoid electrostatic charges on your clothes or body, or discharge static electricity before handling the optical pickup.

9-1 Laser diode

The laser diode terminals are shorted for transportation in order to prevent electrostatic damage. After replacement, open the shorted circuit. When removing the pickup from the mechanism, short the terminals by soldering them to prevent this damage.

9-2. Actuator

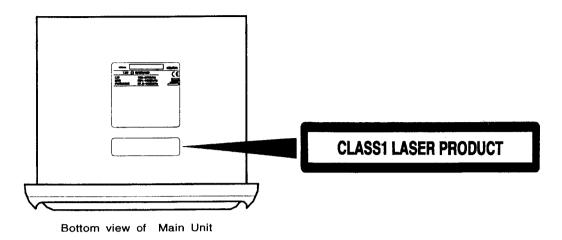

The actuator has a powerful magnetic circuit. If a magnetic material is put close to it, its characteristics will change. Ensure that no foreign substances enter through the ventilation slots in the cover.

9-3. Cleaning the lens

Dust on the optical lens affects performance. To clean the lens, apply a small amount of isopropolal-cohol to lens paper and wipe the lens gently.

CAUTIONS

This appliance contains a laser system and is classified as a "CLASS 1 LASER PRODUST". To use this model properly, read this Owner's Manual carefully and keep this manual for your future reference. In case of any trouble with this player, please contact your nearest "AUTHORIZED service station". To prevent direct exposure to the laser beam, do not try to open the enclosure.

■ NOTES OF ISO CONNECTOR

1.For VW and Audi vehicles, change the position of fuse installation as shown on the diagram.(Figure 1)

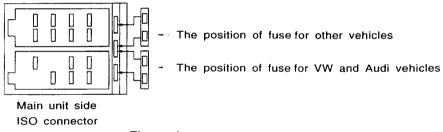

Figure 1

2. The lead include with the unit must be connected to the specified position of the vehicle's ISO connector in order to use the "triggered audio mute for cellular telephones" function. (Figure 2)

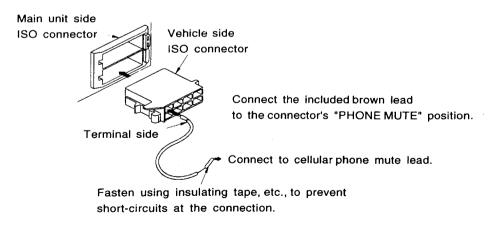

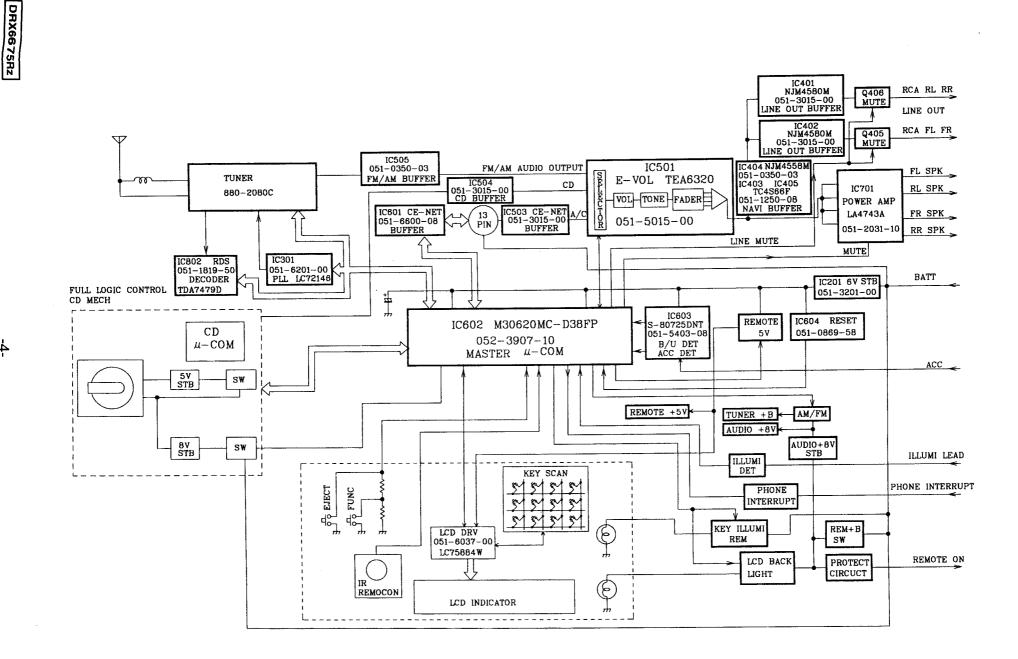

Figure 2

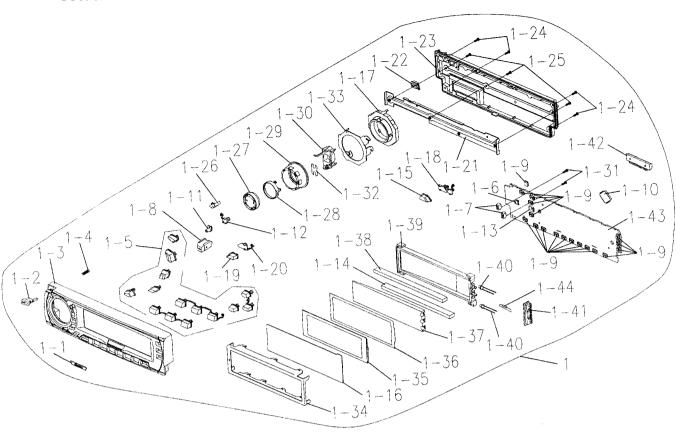

■ EXPLANATION OF IC:

M 30	620MC-D38FP	0	52-3907-10 MASTER MICRO COMPUTER
	vard Form : 100	oins C	QFP
	ninal Description		
pin			GND
pin			GND GND
	4 : REMOCON	. 111	GND
ρ		: IN -	: IR REMOCON input
pin		: IN :	
pin	6 : NC	: IN :	GND
pin	7: RDS CLK	: IN :	: RDS output terminal for discharging the v-
			oltage detected by RDS NOISE
			Input terminal of DATE detection.
			GND
pin	10 : XCIN	: IN :	: Connecting terminal for oscillating crystal for 32.768K
pin	11 : XCOUT	: 0 :	: Connecting terminal for oscillating crystal
			for 32.768K
pin	12 : RESET	: IN :	: Micro computer will stop by turning this te-
			rminal to "Low"
pin	13 : X OUT	. 0	Connecting terminal for oscillating crystal
ρ	10 1 11 00 1		for main system clock CSTCC 10MG
nin	14 : VSS		GND
þш	15 : X IN	: 1114 :	: Connecting terminal for oscillating crystal
